

PerpDEX

A tokenizable DEX for perpetual future

What is Perpetual DEX?

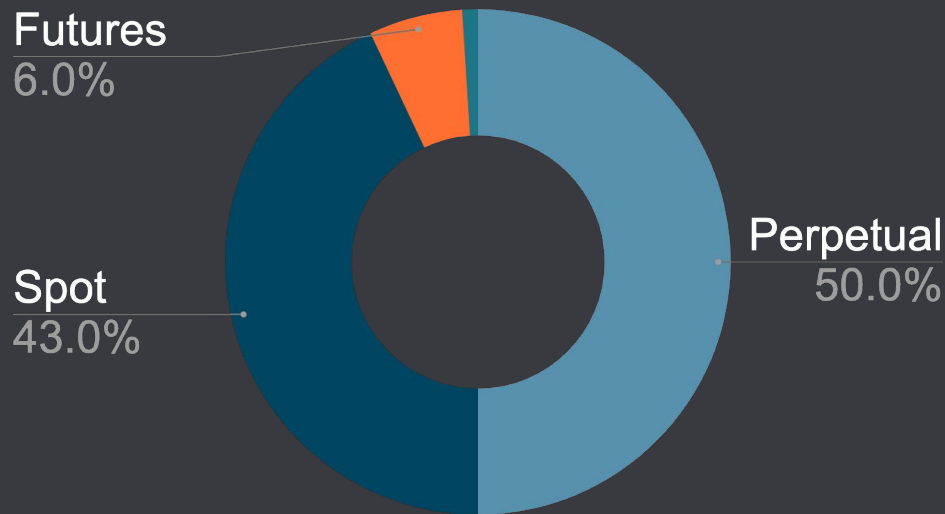

Perpetual future implementation on DeFi

e.g. dYdX, Perpetual Protocol

Perpetual is mainstream in crypto

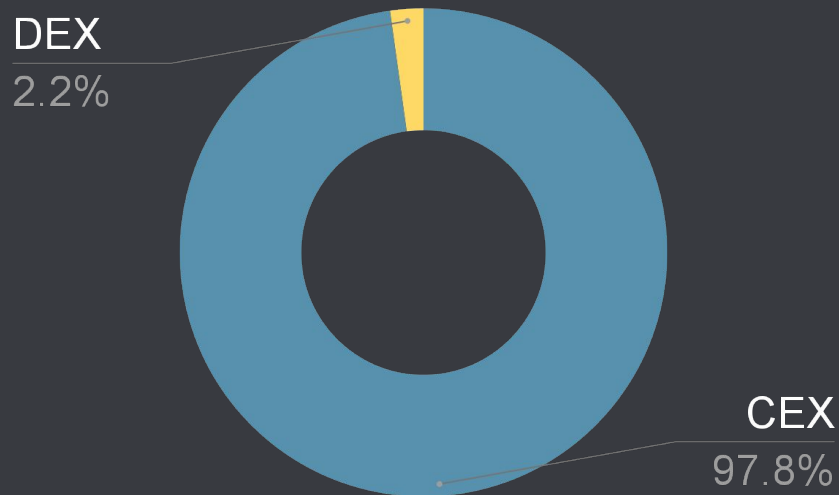

Total Crypto Trading Volume 2021

Perpetual is underrated in DeFi

Perpetual future market share 2021 4Q

Perpetual DEX is growing

Share of the top perpetual DEX (dYdX)

What happens next?

Perpetual DEX will grow explosively

Problem in existing perpetual DEXs

Composability is the biggest problem.

see whitepaper for other problems (security and decentralization)

Why is composability important?

- Composability strengthens **network effects**.
- The more protocols depend on a protocol, the harder it is to be replaced.
- This makes a **moat**.

What causes low composability?

- The cause is the **liquidation risk**.
- All positions can be liquidated in existing perpetual DEXs.
- This makes **position tokenization hard** and leads to **low composability**.

PerpDEX overview

- **vAMM** based perpetual DEX (like Perpetual Protocol)
- **Composability** improvements
- Other improvements (security, decentralization)

Composability improvements

- Liquidation free funding (LFF)
- Tokenization of perpetual positions (ERC4626)

Liquidation Free Funding (LFF)

- A new funding payment method to **remove liquidation risks**
- Funding by **rebasing virtual token** in vAMM
- Can be viewed as extension of **normalization factor** in Squeeth

Liquidation Free Region

- Positions in liquidation free region are **never liquidated**
- u : taker leverage
- v : maker leverage

Tokenization of perpetual positions

- Long token
- LP token

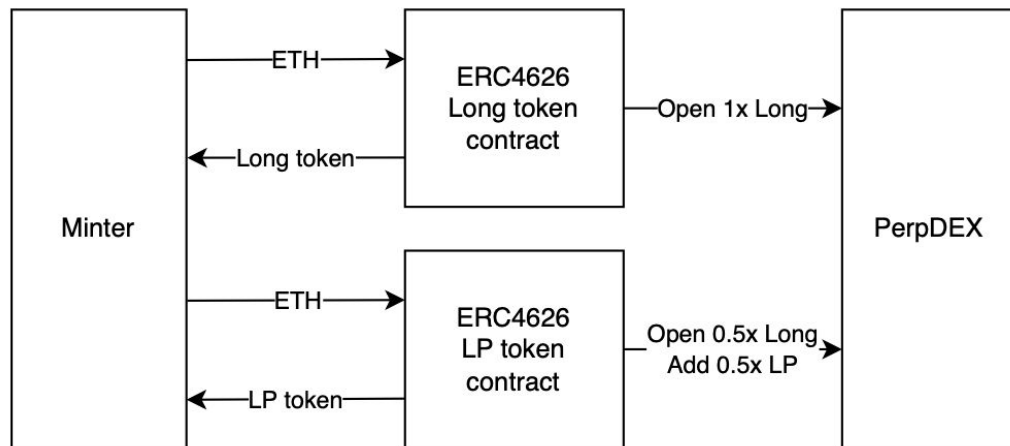

Figure 3: ERC4626 tokenization of PerpDEX positions when quote token is ETH

Applications of tokenization

- Stablecoin (like UXD protocol and Lemma Finance)
 - Liquidation free can only be achieved with PerpDEX
- Synthetic assets (like Synthetix)
 - 100% capital efficiency
- Power perpetual token (like Squeeth)
 - Not only long but also LP can be tokenized and liquidation free

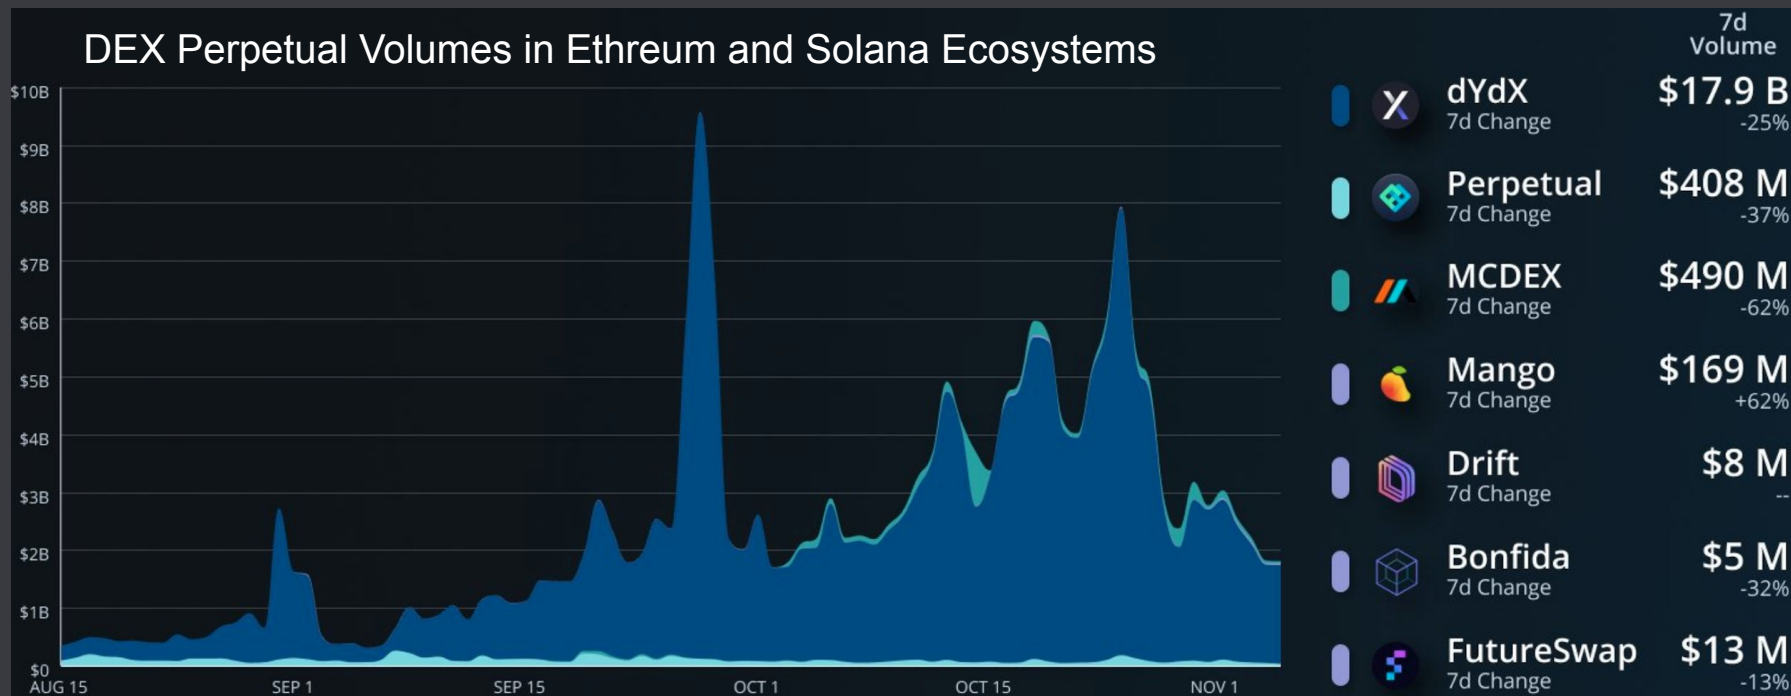

Other improvements

- Security improvements (TSPL, minimizing oracle usage)
- Decentralization improvements (permissionless liquidation)
- See whitepaper for details

Competitors

Perpetual DEX trend is dYdX, Perpetual protocol, MCDEX, Mango.

Date as of:11/7/2021
